PART-2 (Submission of application)

Details of the sponsoring body

1. A Detailed Project Report (DPR) containing its fifteen year detailed Strategic Vision Plan and a five year rolling implementation plan viz. Academic Plan, Faculty Recruitment Plan, Students Admission Plan, Research Plan, Networking Plan, Infrastructure development Plan, Finance Plan, Administrative Plan, Governance Plan, etc, with clear annual milestones and action plans on how the new Institution Deemed to be University is to be set up, with identifiable outputs and outcomes :	The proposed university at Tiruvannamalai envisions becoming a Distinct Category University, focusing on technical excellence, ethical education, and holistic development. The institution aims to offer innovative undergraduate, postgraduate, and research programs that align with global academic trends while addressing regional socio-economic needs. The university integrates science, technology, management, and liberal arts to create a well-rounded academic environment, emphasizing interdisciplinary and multidisciplinary education. The justification for the Distinct Category University status is based on its commitment to offering unique and high-impact programs that integrate technical skills, research innovation, and ethical education. The university seeks to contribute to regional development, especially in Tamil Nadu and Pondicherry, by bridging the gap between industry and academia. It also plans to leverage existing academic strengths from institutions like Arunai Engineering College, Kamban College of Arts and Science for Women and Karan Arts and Science College. The academic programs include courses in environment and sustainability, artificial intelligence, agriculture, health informatics, Indian knowledge systems, commerce, and skill development. Programs like B.Tech. Climate Science & Engineering, M.Tech. AI in VLSI Technology, and M.Sc. Clinical Research & Health Informatics are distinct in their approach, integrating modern technology with real-world applications. Additionally, research domains will focus on agriculture, sustainable technologies, health informatics, VLSI, AI, and Tamil literature. The institution also emphasizes integration with National Education Policy (NEP) 2020, ensuring a flexible, skill-oriented, and industry-linked curriculum. The implementation of Outcome-Based Education (OBE) will ensure students gain practical knowledge, critical thinking abilities, and problem-solving skills tailored for industry demands. The academic plan for 2025-2030 outlines the phased introduction of four undergraduate, six postgraduate, six research program and two skill development programs to align with industry trends and emerging technologies. In 2025, programs in organic farming, sustainability, and solar PV management will be introduced, followed by Tamil culture, agro-electronics, and AI in healthcare in 2026. The year 2027 will see additions in financial risk management and health informatics, while 2028 will focus on climate science and AI-driven NLP. 2029 will introduce AI in VLSI technology and 2030 will conclude the expansion with Thozil Sar Kalaigal in Tamil knowledge systems. Additionally, the research agenda extends up to 2035, covering agricultural technologies, VLSI, AI, sustainable technologies, health informatics, and Tamil literature, ensuring sustained academic growth and innovation across diverse disciplines. International collaboration is a key priority, with student and faculty exchange programs, joint research projects, and dual-degree programs planned with renowned institutions worldwide. The university aims to collaborate with MIT, Cambridge, ETH Zurich, and National University of Singapore, among others, fostering global exposure for students and faculty. A major highlight of the proposed university is its commitment to interdisciplinary research and education, ensuring students gain expertise across multiple domains. Research projects will focus on AI applications in healthcare, renewable energy, sustainable infrastructure, and blockchain-based supply chain management. The institution will also ensure industry-academia linkages, offering internships, research collaborations, and entrepreneurship support. The university's academic and research agenda aligns with global sustainability goals, promoting eco-friendly construction, climate-resilient infrastructure, and smart agriculture. The establishment of centers for AI, NLP, and VLSI research further strengthens its position as a leader in technological advancements and innovation. With strategic investments in infrastructure, faculty training, and industry tie-ups, the university aims to create a transformative educational ecosystem that nurtures future leaders, researchers, and innovators. The financial projections for the proposed university include a well-structured income and expenditure plan, ensuring sustainability and long-term growth. The primary sources of income include tuition fees, research grants, industry collaborations, endowments, and consultancy services. The projected annual tuition revenue from various undergraduate, postgraduate, and skill development programs is estimated at Rs. 35-40 crore, based on the fee structure outlined in the document. Additional revenue will come from international partnerships, sponsored research projects, and government funding for innovation and infrastructure development. On the expenditure side, the major allocations include faculty recruitment and salaries, research infrastructure, digital learning systems, campus expansion, and operational costs. The initial capital investment for research centers, laboratories, and sustainable infrastructure is projected at Rs. 35 crore, covering domains such as AI-driven VLSI research, sustainable construction, health informatics, and agricultural technologies. Recurring costs such as faculty salaries, student scholarships, and administrative expenses will be covered through tuition revenue, external funding, and industry collaborations. The financial model ensures a break-even point within five to seven years, with revenue growth driven by increased student intake, global collaborations, and high-value research projects. The institution aims for self-sufficiency, with reinvestment in academic excellence, faculty development, and research innovation to maintain its distinct status. The university also plans to establish endowment funds and attract corporate sponsorships to support long-term sustainability and growth. The financial plan for Arunai University's transition to a Distinct Deemed University involves a total estimated budget of Rs. 75 crores, allocated over three phases from 2025 to 2040. The financial model includes revenue from tuition fees, research grants, industry collaborations, government funding, and alumni contributions. The major expenditure categories include faculty recruitment (Rs. 16.50 Cr), research labs and equipment (Rs. 24.75 Cr), infrastructure expansion (Rs. 20.65 Cr), and contingencies (Rs. 7.10 Cr). The goal is to achieve financial self-sufficiency within five to seven years, with a strong focus on securing external research funding and strategic investments to sustain growth. The five-year operational plan (2025-2030) is designed to build the academic foundation for Arunai University. In 2025-26, new interdisciplinary UG/PG programs will be launched (2 Cr investment). In 2026-27, research labs and centers of excellence will be established with an investment of Rs. 10 Cr, ensuring state-of-the-art research facilities. 2027-28 focuses on faculty recruitment and training programs (Rs.3 Cr) to attract top educators. 2028-29 marks the implementation of AI-powered Learning Management Systems (LMS) and ERP (Rs. 4.5 Cr) to create a digitally connected campus. 2029-30 includes launching community engagement and industry collaboration programs (Rs. 3.5 Cr) to strengthen the university's social impact
--	---

	and real-world applications of academic learning. The resource procurement plan outlines the acquisition of faculty, lab equipment, digital infrastructure, and industry partnerships essential for executing the university’s strategic goals. Key resources include high-performance computing infrastructure for AI and VLSI research, smart classrooms, research databases, and laboratory equipment for sustainable technologies, precision agriculture, and health informatics. The university will also secure faculty with global exposure, alumni networks for mentoring, and international collaborations to enhance research and academic diversity. Strategic procurement will ensure a balance between cost efficiency and technological advancement, supporting Arunai University’s goal of becoming a globally recognized institution.
Details of the sponsoring body:	Single
Please furnish details of the exclusive society/Trust/ Company formed in the name of the proposed Deemed to be University. Saraswathi Ammal Educational Trust	Upload copy of Registration and List of members 📄 View Document
Whether the applicant sponsoring body has been established exclusively for running educational institutions? (Upload the Registration certificate as well as Registered Deed which specifies that the sponsoring body is exclusively for running educational activities and no other activities are being carried out or shall be carried out in future under it)	Yes
Provide an undertaking that the sponsoring body shall make available the necessary infrastructure for operating the institution deemed to e University without any rental or other such charges.	Not Available
Aims and objectives of the sponsoring body.	📄 View Document
